## The Last Week of October Update

Dear Charles

Last week was a very tough week weather wise which prevented the staff from getting machinery on the course as often as they would have liked. However this allowed them to carry out the following activities as well as routine course maintenance tasks:

- Prepared remaining winter greens
- Cleared significant tree debris from Tees, Greens and Paths
- Main car park cleaned up
- Major repair carried out on tractor
- Major repair carried out on gator
- Cutting units repaired on tee/approach machine

This week planned activities include:

- Painting traffic management markings around the course to protect vulnerable areas
- Roping off specific areas
- Marking new penalty areas as previously communicated
- Dismantling current practice nets in preparation for new installation next week
- Fill in bunkers as planned (assuming it is possible to get tractor/trailer on course)

Huge thanks to Jim Maxwell and Marty Jess for donating new wooden stakes and new ropes to help with the winter programme!

Finally, the wet weather prevented us from being able to get tractor and trailers on the course to complete the planned divoting of all fairways this morning. This activity has been rescheduled to next Sunday 01 November at 9am. Anyone who has not already volunteered and would like to help would be most welcome, the more the merrier.

Please drop me a note ([bfitzpat90@hotmail.com](mailto:bfitzpat90@hotmail.com)) if you would like to help.

Thanks  
Brian Fitzpatrick  
Greens Convenor
