

Greenock Golf Club

Winter Greens

Those members who played yesterday will have noticed that most winter greens have now been prepared and circled with white lines. Whilst we hope that they will not be required too often this winter it is important that we keep them in the best condition possible should they be needed. Therefore I would ask that everyone treats them as Ground Under Repair (GUR) and players take relief if their ball lands on a winter green. Also, please avoid taking caddy cars or buggies over these temporary greens.

Finally a reminder that any member who is able to volunteer an hour or two next Sunday morning to divot the fairways please send me a note and I will send details of planned action later in the week.

Thanks

Brian Fitzpatrick
